First Weekend Assignments

Submission date: Monday, 12:00 PM

Assignment - 1

1.   Learn about Bootstrap 3 and advantages of using it. Note that you do not need to necessarily learn media-queries to learn BootStrap.
2.   Create First Web Page that displays Hello, world! using container class provided by Bootstrap 3.

Assignment - 2

1.   Understand the Bootstrap 3 Grid System and create a web page that looks like below image (ignore the blurred text),

2.

3.   Implement the Project: Travel webpage exercise by using Bootstrap 3 Grid System.

Assignment - 3

1.   Create a basic table containing the First name, Last name and Email as columns.
                  Rows should have a hover effect on them.
   **Hint:** Make use of table classes provided by Bootstrap 3.

Assignment - 4

1.   Learn about the following CSS properties and mention the use case for each value that
   the properties takes,
1.   width and height
2.   margin
3.   padding
4.   border
5.   border-radius
      ●   Mention the CSS properties that can be applied to -
1.   Text – Ex: color, text-align, font-family etc,.
2.   Background – Ex: background-color, background-repeat, background-position etc,.

Bonus

Do this only after you've finished the other exercises. This is not madatory, but good to finish.

Assignment - 5

1.   Create a web page using Bootstrap 3 that looks like below image,

2.

Use text styles instead of plain text.

Use border-radius to the divs.

Try to use all the properties which you have learned from assignment #4 exercises.
